Office Action Summary	Application No. 10/651,056	Applicant(s) POWER, JOHN HENRY THOMAS	
	Examiner Gary W. Counts	Art Unit 1641	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-10, drawn to a method for diagnosing a disease state associated with oxidative stress classified in class 436, subclass 811.
 - II. Claims 11-13, drawn to a method for detecting oxidative stress in a subject, classified in class 435, subclass 7.1.
 - III. Claim 14, drawn to an antibody, classified in class 435, subclass 331.
2. Inventions I and II are independent and distinct inventions. Invention I is a method for diagnosing a disease state associated with oxidative stress whereas Invention II is a method for detecting oxidative stress. Invention II requires producing antibodies specific to at least one peptide fragment of non-selenium glutathione peroxidase protein and assaying for the formation of the antibody non-selenium glutathione peroxidase protein and invention I does not require these limitations. Invention I requires determining an increase over time or comparing the measured level of non-selenium glutathione peroxidase protein with a control level and Invention II does not require these limitations.
3. Inventions I and III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different

Art Unit: 1641

process of using that product (MPEP § 806.05(h)). In the instant case, the product as claimed can be used in a materially different process such as the process of Group II, claims 11-13.

4. Inventions II and III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the product as claimed can be used in a materially different process such as the process of Group I, claims 1-10.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and the search required for one group is not required for other restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gary W. Counts whose telephone number is (571) 2720817. The examiner can normally be reached on M-F 8:00 - 4:30.
